2016
Admission

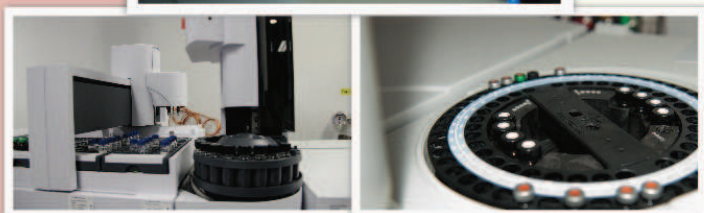

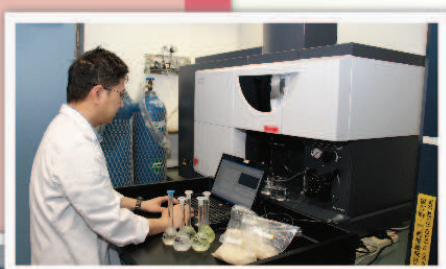

Highlights of Programme

- ▶ Specially design for AD/HD Graduate who is keen to work in the food testing and certification industry
- ▶ Cover essential and comprehensive knowledge of food safety, food testing & certification, and prepares students to embark on a career in relevant industries

Entry Requirements

The requirement for Year 3 entry will be a recognized Higher Diploma, Associate Degree, or equivalent, in related disciplines

The Testing and Certification Industry is one of the industries having an advantages and good potential for further development. The HKSAR Government has identified several industries with potential demand for Testing and Certification Services, including Chinese medicine, construction materials, **food**, jewellery, environmental protection and information and communication technologies. The food trade was selected as one of the industries because of the potential demand for:

- the HKSAR Government outsourcing of food testing;
- the introduction of legal standards and regulatory framework for nutritional content and harmful substances;
- the Hong Kong's external trade for processed food; and
- the high-value food authentication, testing and certification.

In line with the HKSAR Government's strategic direction, the Open University of Hong Kong is offering a 2-year full time face-to-face top-up degree programme BSc (Hons) in Testing Science (Food).

Highlights of Core Courses

YEAR 3

- English Language Enhancement
- Quality Management for Science & Technology
