

## Full-Time Face-to-Face Programme

Construction industry is one of the pillars for Hong Kong economy. Building services engineers play important role in fostering healthy and comfort environment combating global warming and promoting green economy. To cope with the changing role of building services engineers in the society, The Open University of Hong Kong is going to offer a 4-year full time face-to-face degree programme BEng (Hons) in Building Services Engineering and Sustainable Development. The aims of the programme are to provide students with analytical, technical, theoretical and practical knowledge in aspects of building services engineering.

## Highlights of Programme

- **PRACTICAL APPROACH** ●
- Board knowledge of the concepts, techniques, and tools in building services engineering
- HVAC, P&D, Fire and Electrical services
- Integrated design project

## Core Courses

- Heating Ventilating and Air Conditioning
- Plumbing and Drainage Services
- Fire Services
- Electrical Services
- Vertical Transportation
- Lighting Technology
- Building Information Modelling
- Green Building Assessment
- Project and Financial Management
- Environmental Pollution & Global Climate Change
- Environmental Impact Assessment
