

Full-Time Face-to-Face Programme

Construction industry is one of the pillars of Hong Kong economy. There are ever increasing demands of professional in geotechnical, civil and structural engineers for new buildings and infrastructure projects. To cope with the manpower requirement in the society, The Open University of Hong Kong is going to offer a 4-year full time face-to-face degree programme BEng (Hons) in Civil and Environmental Engineering. The aims of the programme are to provide students with analytical, technical, theoretical and practical knowledge in aspects of civil engineering.

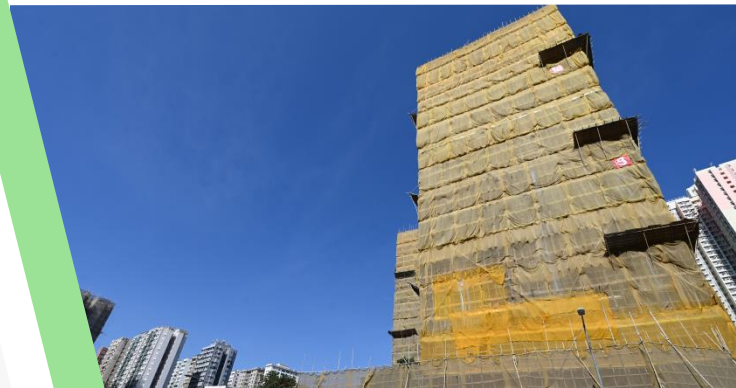

Highlights of Programme

- **PRACTICAL APPROACH** ●
- Board knowledge of the concepts, techniques, and tools in civil engineering
- Structural, civil and environmental engineering

Core Courses

- Structural Analysis
- Traffic Engineering
- Highway Engineering
- Water and Wastewater Treatment
- Foundation and Slope Engineering
- Geotechnical Engineering
- Building Information Modeling
- Project and Financial Management
- Environmental Pollution & Global Climate Change
- Environmental Impact Assessment
